

Wind Warranties For BP Shingles

Building Products of Canada Corp. has always strived to make the best asphalt shingles possible. Advancements in the factory-applied adhesive allowing shingles to seal once installed on the roof, BP offers some of the best wind warranties in the industry. Depending on the BP shingle and the method of installation, homeowners can get protection from winds up to 220 km/h or 135 mph (see Table below).

Standard Wind Warranty :

All BP 3-Tab Shingles, when installed using standard application instructions, are warranted against wind damage or shingle displacement for winds up to 115 km/h (70 mph). All BP Laminate Shingles are now backed with BP's innovative Weather-Tite™ Technology. These Shingles now include 2 Sealant Bands which warrant against wind damage or shingle displacement for winds up to 180 km/h (110 mph).

High Wind Warranty :

To qualify for High Wind Warranty, which warrants against wind damage or shingle displacement for winds up to 130 km/h (80 mph) for all 3-Tabs and 220 km/h (135 mph) for all Laminates, shingles must be fastened using 6 nails and all shingles located at the roof edges must be cement together in a 10 cm (4") wide layer of Asphalt Plastic Cement. Please see the table below for the High Wind Warranty for each BP Shingle model. If above special application instructions are not followed, shingles will revert to the Standard Wind Warranty of 115 km/h (70 mph) and 180 km/h (110 mph) respectively.

BP Shingles	Standard Wind Warranty	High Wind Warranty
<ul style="list-style-type: none">• Manoir• Everest• Harmony• Mystique	180 km/h (110 mph)	220 km/h (135 mph)
<ul style="list-style-type: none">• Yukon SB• Mirage GS• Dakota	115 km/h (70 mph)	130 km/h (80 mph)
